

PROCESSING SOLUTIONS

VACUUM

Kametal distributes mobile or fixed Industrial Vacuum Units. We provide a wide range of readymade, standard units that go from powerful (15 kW) to extremely powerful (350 kW).

DEDUSTING

Our process engineering team develops any dedusting system, going from central vacuum systems to low pressure high air flow dedusting systems with filter mediums up to 100.000 m³/h. which can be installed by one of our assembly teams.

PNEUMATIC CONVEYING

We design, engineer and develop your Pneumatic Conveying system based on pressure or vacuum, following your needs and those of the product. This product can be powder, fibres, pellets, granules, seeds... Our experienced assembly team travels worldwide to install and start-up the system. We are therefore your ideal partner in worldwide bulk handling systems.

TURN-KEY PROJECTS

Thanks to our know-how, our perfectly organized team and fully skilled staff, we can deliver turn-key projects for mobile vacuum units, vacuum trucks, dedusting systems, central vacuum systems and pneumatic transport systems. We can also design and deliver anything that is associated with the above systems: storage, piping, cyclones, screw conveyors, big-bag handling systems. Any part of your bulk handling process.
